BLACK GOLD

Humus Organic Biofertilizer **Foliar Spray**

BLACK GOLD - Liquid Formulation (Liquid Biofertilizer for Foliar Application)
for Vegetables, Fruits, Plantations and all agricultural crops.

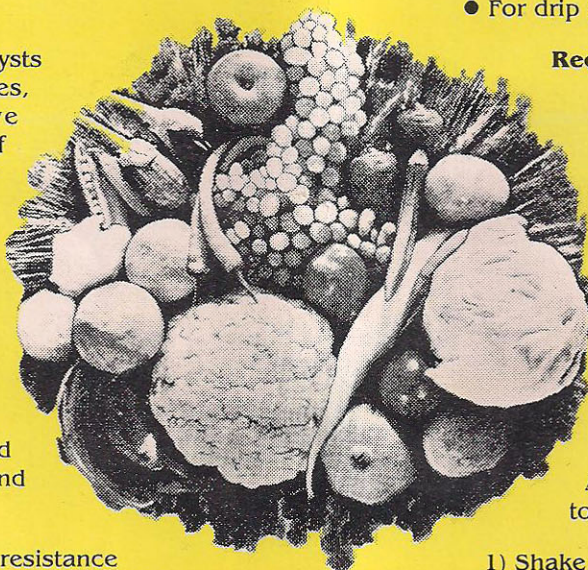

Black Gold Liquid Formation is for foliar application which helps in enhancing the growth during critical stages like vegetative growth/flower/bole formation/fruit formation/pod formation and results in higher yield.

Ingredients:

Erthirin extract, NPK traces, Micronutrient traces.

Salient Features:

- It acts as Biological catalysts in the growth of plant tissues, which results in vegetative growth, emergence of inflorescence and higher yield.
- It boosts in photo-synthesis activity by way of increasing chlorophyll which enhances the green colour of leaves.
- Enhances flavour, colour, aroma, size, weight and shelf life of fruits, vegetables and other crops.
- It helps in developing resistance to pest and diseases (antifungal and antifudent).
- Non-toxic.
- Helps in Root Development and absorbing required quantity of nutrients from the soil, which results in size of leaves, flowers, fruits and higher yield.
- All the contents are in natural form and eco-friendly. Hence, there are no side effects.
- For seed treatment before germination.

- For drip irrigation application.

Recommendations:

Black Gold Liquid Formulation is recommended on all crops. It gives good results on cereals, pulses, grapes, paddy, sugarcane, vegetables, coffee, tea, arecanut, horticulture crops etc.

Dosage:

250 ml is sufficient per spray during vegetative growth and flowering stage/fruit formation, (2 spray) per acre.

Add 25 - 30 ml. of Black Gold liquid to 20 litres of water.

- 1) Shake well before use.
- 2) Spray during morning or evening (cool hours)

Packing:

250ml, 500 ml and 1000 ml.

Shelf life:

2 years

Maximum Retail Price:

250 ml packing - Rs. 125
500 ml packing - Rs. 240
1000 ml packing - Rs. 460
